

ENTREPRENEURSHIP DEVELOPMENT CELL

Entrepreneurship Development Cell (EDC), NIFFT, Ranchi was established in the month of August, 2016 with the handholding of college authorities and an amazing team of some startup enthusiasts to foster the spirit of entrepreneurship in the college campus.

With some weekly meetups and discussions, this caught up speed. Several events like B. Plan competition, Expert Talk, Startup Connect, Undeployed (a session on design carried out by experts) etc. have been organized after then. An annual B. Plan competition is organized every year during JINKS Pranav: the annual cultural techno management fest of NIFFT and the winners are given cash prizes for their business plans. Apart from this, the EDC members do regular discussions on a weekly basis on different topics.

EDC has been able to support some amazing ideas in the college and converted them into successfully emerging startups. The cell has an MoU with the Entrepreneurship Development Cell of BIT, Mesra under the EDC Mentorship Program through which, the cell gets various types of support like advisory, connections and expertise.

EDC, NIFFT also has an unofficial collaboration with Headstart, Jharkhand to get mentorship and advisory for the people who seek for it, on regular basis. A social initiative named "Koshrit" was also started by the cell in order to provide a healthy living to people who can't afford to have one. Under this initiative, we connected the organizations providing treatment of diseases for free or very small charge to people who have those diseases but they can't afford the treatment costs.

College officials have been very supportive for any relevant step taken by the cell. EDC, NIFFT exists to grow and maintain a habitat for ideas and innovation sprouting in the college campus and outside.
